

Bear Tracks
Smarter at Every Step.

100% Web Based. Easy to Use. Easy to Love.

Tracking the Workplace In Motion

BearTracks is one of the best-loved workplace tracking solutions in the world -- used on every continent but one (and we're coming for you, Antarctica!). Maybe that's because BearTracks isn't just about tracking. It's about intelligent tracking.

Intelligent tracking allows an easy-to-understand dialogue between individual processes, people, transactions, assets, and locations. It's designed to transform historically siloed functions into seamless coordinated actions -- within a single workplace or across multiple sites around the world.

BearTracks uses intelligent tracking to follow and connect the behavior, location, and workflow of individual mission-critical items and tasks -- from documents and supplies to employee requests and tasks. Information is aggregated and easily visible, so performance can be monitored and improved every step of the way. The result is greater control, accountability, and efficiency --- making you smarter at every step.

MEET THE MODULES

BearTracks monitors and controls the flow of objects and services as they move through your workplace, giving you complete visibility at every step. Each module can stand alone or can be fully integrated to bring you even greater insight into every aspect of your workplace:

Mail & Parcel

DELIVER a complete chain of custody

Supply & Inventory

CONTROL inventory in real time

Printer Fleet

MANAGE devices and the jobs associated with them

Rooms & Tasks

MONITOR the status of scheduled services

Complete **Visibility** for the Workplace in Motion

ACCOUNTABILITY

Maintain complete chain of custody for all items including confidential data, critical documents and other high-value items.

COMPLIANCE

Create workflows for regulated processes, and prove to auditors that workflows were strictly followed.

COST REDUCTION

Reduce direct and indirect costs with technology that improves efficiency and operational effectiveness.

CONTROL

Leverage targeted reporting and displays to improve internal logistics operations.

EFFICIENCY

Speed time-critical activities via well designed functions and user interfaces.

IMPROVED PERFORMANCE

Monitor and measure key performance indicators to improve operations and demonstrate compliance with service level agreements.

Configurable. Scalable. Flexible. **We Move the Way You Move.**

Get Smarter at Every Step

INTEGRATION IS OUR SPECIALTY

The Bear Difference

BearTracks expertly picks up the trail YOU need to track, follows the flow of information seamlessly across one site or multiple sites, captures it in a friendly, easy to use format, and puts it right at your fingertips.

We make collaboration across the entire workplace a breeze. No matter what you need to talk to.

WHAT'S NOT TO LOVE ABOUT THAT?

PERFORMANCE MANAGEMENT

You need to pay attention to the tiniest details and the big picture when you are trying to improve operational efficiency. Bear Tracks delivers real-time analytics every step of the way. With every action and event, Bear Tracks analyzes operational data to produce timely, targeted scorecards that measure performance against Key Performance Indicators (KPIs).

This information can then be used to prove - and improve - compliance with Service Level Agreements (SLAs). BearTracks allows you to track business rules, SLAs, KPIs, locations, events, statuses, part or the entire workflow of the different services and get detailed reports and analytics from the data that has been collected. You can use operational, statistical or research reports for every site and for every process. Every report can also be distributed to other systems as a PDF, or exported to csv and Excel.

PERSONAL PORTAL

Stop chasing down information - let it come right to you. The Personal Portal brings the enterprise-class functionality of Bear Tracks to the desktop, allowing individuals to view and track the status of their requests and monitor their current status. Proactive notification via automated e-mail keeps employees informed of delivery or request status. And our mobile capacity means you can use BearTracks on the go.

WORKFLOW THAT REALLY GOES WITH THE FLOW

Designed with you in mind, with years of experience in Workplace Management, you'll find our easy to configure software will support any type of process - anywhere, anytime. Need distinct workflows in each location and for each individual process? No problem. For example, a large site can use completely different inbound workflow than a small site. Or, the inventory stock rooms in a global company can be managed differently in each country. Having a flexible configuration ability means you can continue to use processes that are currently in place, or improve and change processes overtime, without changing the product itself.

IT loves us, too

WE DON'T BUILD TRAPS. WE SET YOU FREE.

BearTracks offers a unique combination of intuitive interface and highly functional software “under the hood”. The software is designed to enhance efficiency and service levels with easy-to-use tools, all the while collecting metrics that can be used to improve the overall operation.

- Support IT standards

- Performance
- Failover/redundancy
- Internal or external hosting
- Virtualization
- Cloud computing
- Platform Integration
- Configurability
- Internationalization/localization
- 508 compliance
- Security

Used (and loved) around the world.

We are proud to say that many of the world’s leading institutions use Bear Tracks to give them a true competitive advantage – from social media giants to sprawling universities to the federal government.

But whether our clients are small organizations or household names, we get to know every one of them personally and enjoy trusted, loyal and repeat relationships. Maybe that’s why our clients are used to seeing such serious success, because we love the relationships as much as the results.
